Social Service Accelerator Track

Agile Systems Development

This module provides participants with an understanding of key Agile concepts, principles and methodologies. To discover how Agile, which is an iterative approach to project management and software development, helps teams deliver value to their customers in small increments and faster in the Digital Age.

Module Objectives:

By the end of this module, participants will be able to:

1. Adopting Agile concepts and principles;
2. Planning and delivering a project iteratively and incrementally with Sprints;
3. Tracking and reporting project progress and deliveries;
4. Improving the process with retrospectives;
5. Assessing good for business user-centric value

Topics:

1. Agile principles
2. Roles and responsibilities within an Agile project
3. Benefits and limitations of Agile Project Management
4. Scrum methodology with Jira

Target Audience:

Professionals with 0-5 years' experience managing volunteers for their respective organisations.
